WE ARE PROUD  
OF OUR LAND,  
OUR PRODUCTS,  
AND OUR NAME.

WE ARE  
UGG AUSTRALIA,  
OWNED AND MADE  
IN AUSTRALIA,  
AND WE WILL  
CONTINUE TO  
SHARE THIS GREAT  
AUSTRALIAN  
TRADITION.

# OUR PRODUCTS ARE PROUDLY MADE BY HAND, IN OUR FACTORY, IN MELBOURNE.

**In a high ceilinged warehouse nestled in Melbourne's outskirts, fingers investigate a natural Australian sheepskin, deftly searching out any imperfection.**

**The skin is strong, the wool is dense. The finish is pure. The fingers pause, satisfied.**

**A small smile, and the sheepskin is deftly swung to one side, and replaced with another from the tottering pile.**

It's a philosophy. It's not just about using Australian materials because they're authentic, or because they're great quality. Partly, it's about keeping the Australian heritage alive.

But mostly, it's about crafting a pair of boots with care, adjusting something just because it feels right in your hands, and creating something exceptional that will last for generations to come.

Just like Australian culture, the sheepskin boot is simple, functional and easygoing. And just like Australian core values, our boots are always evolving and improving and adapting: secure in a tried and true foundation, but engaging with modern thinking and innovation.

It's a philosophy born of a love for excellent quality, kept alive by a nation's loyalty to the product, and invigorated by one family's passion.

# THREE GENERATIONS OF PASSIONATE CRAFTSMEN.

**It was with a rich heritage of Russian craftsmanship in their hands, and hearts full of enthusiasm for their new home, Australia, that Roman, Luda, grandma Maria and their two little children Steven and Lena, arrived in Melbourne.**

**The family learnt from their new land, and the raw materials of Australia led them towards a new idea; embodied by intricate workmanship perfectly harmonised with pure Australian culture. It was an idea that still endures.**

**An idea we now know as Ugg Australia.**

From two humble sheepskins spread across a wooden work bench, a family business grew – nurtured by Luda’s steady head for business, Roman’s innovative workmanship and from 2002, their daughter Lena’s youthful enthusiasm.

A flourishing stall in the chaotic community of Melbourne’s Vic Market led to Australia wide distribution.

*“When I made Australia my home 35 years ago I promised myself that I would be Australian, support this country and enjoy all it offered me. I am so proud of Ugg Australia and our use of Australian components, Australian skills, Australian innovation and the amazing Australians we have met along the way.*

*My message today is BUY AUSTRALIAN,  
SUPPORT AUSTRALIAN PRODUCTS  
and SUPPORT AUSTRALIAN BUSINESSES.”*

# OUR TANNERY IS BORN.

**We have never been afraid of a bit of hard work.**

**So when we couldn't guarantee the supply of the best quality sheepskin, we didn't hesitate to take on a new challenge and open a tannery of our very own.**

Today, we're the only Aussie sheepskin footwear manufacturer preparing materials in their own tannery. Our tanning process takes about ten days, during which the hides are cleansed, combed, buffed, polished and dyed with care.

Having our own tannery means that we can ensure the very best quality from sheep to boot. You can tell our sheepskin boots are the best because they hold their shape.

# 30 YEARS IN THE MAKING.

**Like our boots, the processes we use to make them are tried and true, improved by time and a little extra inventiveness.**

**Developed over 30 years, we continue to engineer the methods and equipment we use to get the very best out of the materials. And we keep them top secret.**

We use a customised dyeing process for the strongest, non-running colour. We have also developed innovative techniques, including a double gluing heat method and a sophisticated sideways stitching system to secure our soles, some of which are designed to be resistant to temperatures of -40°C.

And we use the best skins, for sheepskin boots that are faithful to the true heritage of Australia.

100%  
AUSTRALIAN  
MERINO  
SHEEPSKIN.

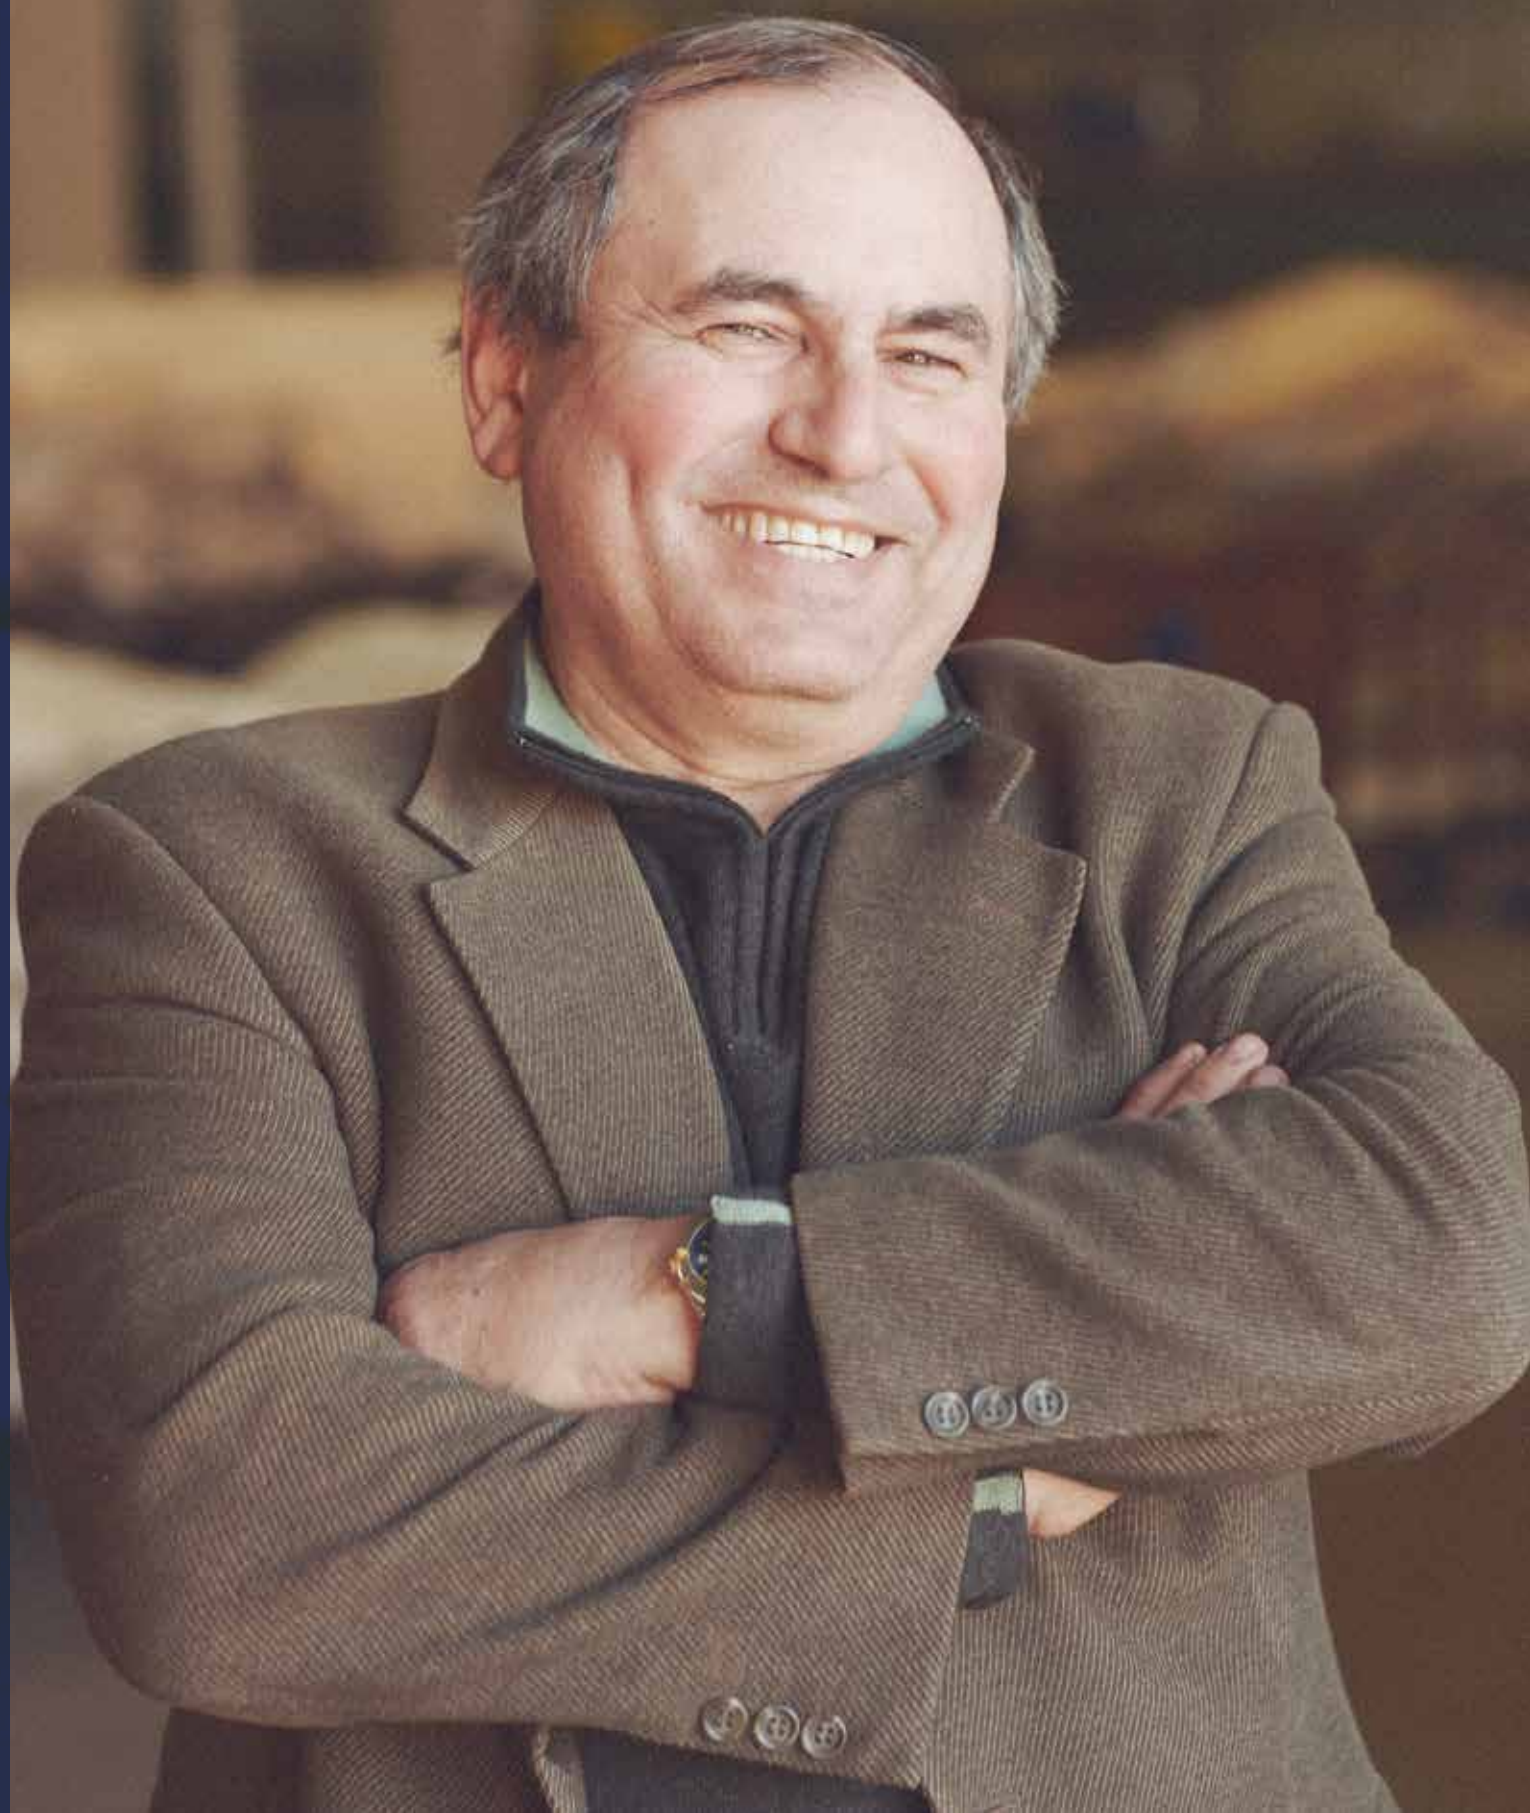

THE BEST  
THERE IS.

**Since the first Merino sheep hitched a ride in 1788 with the First Fleet, Australian sheep have adapted to the dry and challenging environment.**

Aussie sheep have a thicker pelt of coarser wool, with between two and four thousand strands per centimetre, compared to the average 500 of New Zealand and European sheepskin.

Australian wool is strong and dense, and perfect for footwear. It keeps its shape, it's super comfy and it feels like home.

# WHAT'S IN A NAME.

**They're swooping through Aussie history warming the feet of fighter pilots, and walking the hippy road to Byron Bay in the 1960s. They're stomping out of the surf at Bells in the 70s, and they're probably under your bed right now.**

**On your feet, they'll last a lifetime, but the idea of the sheepskin boot has lasted generations.**

The truth is, no one knows exactly where the idea came from, or where they got their name. Is it the 'hug' you feel when you slip them on, or your sigh of 'Ahhh' as your feet sink into the pillowy softness? What we do know is that the sheepskin boot was born here in Australia, and its legend is unequivocally Aussie.

The ownership of the word 'ugg' has been contested for more than four decades, but we have been selling Ugg Australia branded footwear in Australia continuously since 1981. We are the last company to tan sheepskins here in Australia, using the thick pelt and dense wool that only comes from Australian sheep. And we cut, stitch and glue every pair of sheepskin boots here in Australia, as we have done for the last 30 years.

We are proud of our land, our products, and our name. We are Ugg Australia, owned and made in Australia, and we will continue to share this great Australian tradition.

# RUG RANGE

From the lush pastures of the southern regions of Australia, come the purest quality sheepskins. Roman Tannery captures and enhances this unique quality with our fine processing techniques and a great deal of pride and care.

As the only sheepskin footwear tannery in Australia, our family owned company takes great pride in our 100% Australian owned and made product range.

Using ecologically-friendly, techniques complying with the highest EPA standards, customers are drawn to the plush density of the 100% merino wool, and the strength and consistency of the finishes and colours.

Let us share this proud family tradition with you and raise the standard of functional and fashionable ranges.

Thank you for choosing Australian made.

# PRODUCT INFORMATION

## CARE

At Ugg Australia we care about our products and our customers. We create the best sheepskin boots using the highest quality Australian merino sheepskins to last you for years to come.

Australian Merino Sheepskin benefits from a little love and attention. Your consistent care will extend the life of all of our products. To maintain your premium quality product it is possible to use protective sprays to help prevent against dirt stains or watermarks.

Ugg boots should be maintained like any other shoe, the colour will fade with time as the material will wear down. Ugg Australia does not recommend to wash these products, as with shoes or any woollen product, results can vary.

**NOTE:** Sheepskin is a natural fibre and as with other premium grade materials, not all stains can be removed or entirely prevented. We create your boots from the best skins available, so please exercise care during use.

### Care Kits

Our Ugg Australia 'Care kit' and protector sprays are especially formulated to nourish and help upkeep the condition of your Ugg Australia boots. Sheepskin is a natural luxurious material and it needs to be looked after to maintain the look and feel of the sheepskin. We have developed non-toxic products that protect our Ugg Australia products for water resistance from liquid spills.

You can purchase our Water & Stain Protector in 100ml aerosol or pump, a lightweight shoe horn, wooden suede brush, and shoe refreshers as part of Care Kits at stockists, at our factory shop and our online store.

To get the best out of your Ugg Australia products, please adhere to the following instructions.

### Directions

- We recommend a spot test on an inconspicuous area, before spraying the entire boot.
- Spray lightly over entire boot from a distance of 10cm, let dry.
- For optimum protection, repeat application then leave to fully dry before wearing. (Drying time may vary depending on climatic conditions.)
- Repeat application every 3-4 months or more often if necessary, this will also help to retain colour and maintain water resistance.

**NOTE:** Ugg Australia recommends using our care protection and care products on Ugg Australia products only.

## REMOVABLE INNERSOLES

All of our boots (excluding children's Princess and scuffs) have removable innersoles, which can be replaced. When replacing the innersoles, ensure that the size is appropriate for the boot.

Fit inside the boot from toe to heel ensuring the new innersole is flush with the boot. Every pair of our boots can feel new and fresh with a replaceable innersole inserted.

# 12 SECRETS FOR THE PERFECT BOOT

The most important secret we have.  
Our products are Australian made and owned.

---

All of our sheepskins are tanned in Australia's last  
sheepskin footwear Tannery –Roman Tannery.

---

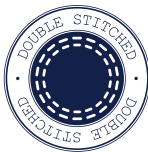

We use the purest, warmest, most luxurious  
Australian merino double faced sheepskin.

---

Our First Stitch Golden Tag is stitched in the very first  
step of the construction of our boots, guaranteeing  
that 100% of our boots are made in Australia.

---

All our boots feature reinforced and double stitching  
for extra strength and durability.

---

Heel and toe section reinforced with suede  
for extra support and structural integrity.

---

Our thermo plastic rubber sole has superior grip and is resilient  
to –40°C. The high density EVA has longer lasting, durable wear.

---

Sheepskin naturally regulates body temperature  
to keep you comfortable regardless of the season.

---

Our products are made to comply with the highest  
global EPA standards.

---

Use Ugg Australia care products to maintain  
the look of your boots.

---

Improves circulation. Draws moisture away from  
skin for greater comfort and healing.

---

Innersoles can be replaced for boot longevity and  
innersoles can be used for comfort in other footwear.

---

# FIRST STITCH GOLDEN TAG

**We have Australia's last operating Sheepskin Tannery guaranteeing that we are the only ones in the world processing Australian sheepskin 100% within Australia.**

This ensures that we use eco-friendly techniques following strict Australian standards of chemical use, EPA rules and upholding over 100 years' tradition set by Australian manufacturers.

We are proud to promote our "First Stitch Golden Tag".

Why do we call it 'First Stitch Golden Tag'? This is because our golden tag is stitched in the very first step of the construction of our sheepskin boots and cannot be replicated during any future processes.

## **Our products...**

Our products are not significantly transformed in Australia, our products are cut, stitched and glued 100% within Australia.

Our products are not with a cost of more than 50% made in Australia, our products are from the farmer to the final boot, 100% Australian made.

Our products are not just Australian sheepskins, our products are 100% Australian Sheepskins, which are 100% process tanned in Australia.

Our boots and slippers are true to size so please follow our size chart.

Sheepskin boots do stretch, more than leather shoes and with wear the wool will compress in every direction to accommodate the shape of your foot and calf. A snug fit when trying on your boots is highly recommended.

All of our footwear is marked in both mens and womens sizing.
